

# Step 1: Creating the Google form

The screenshot shows a web browser with multiple tabs. The active tab is 'Untitled form - Google Forms'. The address bar shows the URL: docs.google.com/forms/d/1EeZ7fshxJUehrpKpHY49WpJ3qkFsa6GykP\_UxVuXLc/edit. The form editor interface includes a top bar with 'Untitled form', a folder icon, a star icon, and a 'Send' button. Below the top bar are tabs for 'Questions', 'Responses' (with a count of 3), and 'Settings'. The main form area contains a title 'Assignment Task' with a horizontal line below it. Below the title is a text input field with the text 'client onboarding'. Below this is a text input field labeled 'Name' with a red asterisk indicating it is required. Below 'Name' is a text input field labeled 'Email'. Below 'Email' is a text input field labeled 'Company Name'. To the right of the form fields is a vertical toolbar with icons for adding questions, duplicating, deleting, text formatting, image, video, and a list icon. A question mark icon is visible in the bottom right corner.

# Step 3: Connecting the Google Sheets in Make.com

The screenshot shows the Make.com interface for creating a scenario. The main workspace displays a workflow diagram with a Google Forms trigger (Watch Responses) connected to a Google Sheets action (Add a Row). A settings panel for the Google Sheets action is open on the right, showing configuration options for connection, search method, drive, spreadsheet ID, sheet name, headers, and values. The bottom of the screen includes a 'Run once' button and a 'SCHEDULING' section with a toggle for 'ON' and a frequency of 'Every 15 minutes'.

# Given the router for the good understand about 3 Services

The screenshot displays the Make.com (formerly Integromat) interface for a scenario titled "Integration Google Forms". The main workspace shows a workflow diagram with the following components:

- Google Forms** (Watch Responses) connected to **Google Sheets** (Add a Row).
- Google Sheets** connected to a **Router** node.
- The **Router** node (labeled "Router" with an arrow) branches into three parallel paths, each leading to an **Email** (Send an Email) action.
- The paths are labeled: "1st | A Type = Consulting", "2nd | Typology", and "3rd | A Type = IT Support".

At the bottom left, there is a "Run once" button and a scheduling section with a dropdown set to "ON" and a timer set to "Every 15 minutes".

On the right side, the "Email" configuration panel is open, showing the following settings:

- Content Type:** HTML
- Content:** A text block containing a personalized email template:

```
Hi {{4. Answers.Name .textAnswers.answers[0]: value}},  
<br><br>  
Thank you for your interest in our Consulting services! We are excited to explore how we can assist you in overcoming challenges and driving growth.  
<br><br>  
One of our consulting experts will reach out shortly to discuss your specific needs and guide you through the next steps.  
<br><br>  
If you have any questions in the meantime, don't hesitate to contact us!  
<br><br>  
Regards,  
<br><br>  
CA Consulting
```
- Attachments:** A section with a "Map" toggle and a "Show advanced settings" checkbox.
- Buttons for "Cancel" and "OK" are at the bottom right.
